

## GENERAL NOTES

The existing surface levels indicated on this plan have been interpolated from a digital terrain model created from a feature survey carried out prior to the lots being pegged.

They are not levels taken at the individual peg locations, and their accuracy is limited by the accuracy of the model and the process used to interpolate them from the model.

The finished surface levels indicated on this plan have been interpolated from a digital terrain model surveyed following construction works.

No responsibility is accepted for any damages or financial loss incurred due to the use of this plan

NS denotes Natural Surface  
FS denotes Finished Surface
